Medical Comments: Subcontractor began to experience eye, nose, and throat irritation about 1 month ago after entering the FCC 2d floor "cube farm." Has used cold & allergy remedies with some success.										
ESH Comments: Probably not work-related. Still being investigated.										

Unusual Occurrence Reports from other DOE Labs of interest here:

1) Suspect/Counterfeit Bolts Identified at ANL (Building 203 Cooling Tower Project)

1 SC--ASO-ANLE-ANLEFMS-2007-0011	4	10/10/2007
Facility Management Services	Notification/Final	10/12/2007

Description of Occurrence (partial):

While conducting a materials inspection with the subcontractor, the ANL-FMS project specialist noted a bolt with the "JH" headmark. In checking the headmark against the DOE list of Suspect/Counterfeit Items, they noted that 20 bolts of the Grade A325 type of size 5/8-11 were found. These bolts were to be used in the Building 203 cooling tower construction project.

Did you know...

- That from January thru September (2007), there were **529 moving citations** issued to Fermilab employees & visiting scientists by our security department? As line managers, are you enforcing the requirements of FESHM 9010?
- That there have been **32 government vehicle accidents** reported to our security department from January thru September (2007), 17 of which were caused by improper backing?
- That the Laboratory Safety Committee has set a goal of **reducing the rate of vehicle accidents by half** during the next twelve months? Have you discussed this with your employees?
